

BIOMASS data products & Ecology, Carbon Cycle and Earth System Science

April 15, 2021, 14:00 - 17:00 CET

Agenda

14:00 – 14:15	Welcome and icebreaker Nuno Carvalhais
14:15 – 14:40	Presentation of BIOMASS mission / products + discussion Kostas Papathanassiou
14:40 – 14:55	Biomass estimation in tropical forests in Indonesia using active Anna Berninger
14:55 – 15:10	Global patterns of tropical forest fragmentation Franziska Taubert
15:10 – 15:25	How can biomass data inform C model calibration and testing Mathew Williams
15:25 – 16:05	Break and Discussion in Break Out Rooms
16:05 – 17:00	Discussion
17:00	Adjourn

Additional information: Aim of this workshop is to get feedback for our data usage concept from a diverse group of researchers in an interactive workshop setting. Thus, we decided to keep the numbers of BGI internal participants small. We know that there are many outstanding researchers on this field in our department, but getting a diverse perspective is key for this project. We hope you understand our decision. If you are interested in the workshop, please contact [Stefanie Burkert](#) for more information and how to participate.

Who are we?

Project Office BIOMASS is a collaboration of the Max-Planck Institute for Biogeochemistry, the German Aerospace Center (DLR), the Helmholtz Centre for Environmental Research and the Department for Remote Sensing at the Friedrich Schiller University in Jena. We are funded by the German Federal Ministry of Economics and Technology.

Supported by:

on the basis of a decision
by the German Bundestag
