Place: MPI for Biogeochemistry, seminar room A2.025

Instructor: Silvana Schott, Technical Editor, MPI-BGC

4 out of 6 participants filled in the survey by December 10, 2015.

Survey results

To which extend has the course improved your skills? Do you think your time was well spent in this course?

- YES
- Yes, I liked to have an overview of the Illustrator programme.
- not really
- Very very basic. It was okay. To my opinion one could move on faster with the tools.

Did the course match your expectations based on the information provided prior to the course?

- YES but it could have been more effective if the time period was more.
- Yes, considering the time allocated for it. It is not possible to go much further only in 4 hours..
- Hope more In-depth applications.
- I expected to get more out of it.

Which parts of the course were especially good (and why)?

- For me all parts of the course were good since I was new to this software. Practical session was more good.
- I liked the explanation about the Illustrator main tools
- The last part of showing the results and draw the trees, like that.
- that we applied the tools directly

Which parts of the workshop were not so good / not so fitting / not well enough presented?

- I think all parts of the course were well presented as well as our problems were sorted out on the spot.
- I will answer point 4 and 5 together. I would have like to have a course guide, with the explanations of Silvana (in english). It would have helped me to follow better the explanations. Otherwise, people are constantly asking, where I have to click, how can I do that...It might help to use better the time if the guide is sent to attendences with some days in advance.
- Talk too much about the foundation
- too slow

Do you have other suggestions for a future workshop?

- More time period for practical session
- move on faster and announce that it is a course for absolute beginners
